SUMMARY

I am 20 years old and currently studying computer engineering, with English as the course language. My passion for coding led me to teach myself programming. I am focusing on developing skills in machine learning, data science, and artificial intelligence. While I'm still in the early stages, I'm committed to continuous learning and growth in these fields.

EDUCATION

- Kanuni Mesleki ve Teknik Anadolu High School   **2018-2022**
- Düzce Hakime Erciyes School of Foreign Languages - English   **2023-2024**
- Düzce University- Computer Engineering(english)   **2023-**

MY PROJECTS

Portugal Politecnico Desantarem university

- I granted the opportunity to complete an internship through the Erasmus program in Santarém, Portugal.   **2022**

Python

English vocabulary application:

While learning Python, I developed an application to help me track unfamiliar English words. The app has four main features:

1. "My Lists": Create, open, save, and delete lists where you can add words, meanings, and examples.
2. "Translation": Translate words, sentences, or paragraphs between English and Turkish, and add them directly to your list.
3. "Practice": The app creates quizzes from your lists and provides multiple choices. Additionally, Gemini AI can generate quizzes and explain answers.
4. Grammar Correction: Checks the grammar and errors of a sentence you submit.

Through this project, I improved my OOP skills, working with functions, classes, and multiple files, and saved data in JSON and TXT formats without privacy concerns.

Pdf converter:

- An interface application that converts a pdf file into a word file.

CERTIFICATES

- I I've gathered all my certificates in this link.

SKILLS

- Sql, MySql, Data Science, Machine Learning ,Desktop App (NumPy, Pandas, Matlab,Seaborn,Tensorflow, Tkinter, and CustomTkinter.)
- Web design with wordpress
